LouisE – Quick Guide

Book a parking slot at any Schuler office: **https://louise.schuler.de**

---

1. Sign in

- **Andritz employees:** click **Continue with Microsoft**. Done.
- **Everyone else: Create an account** → click the link in the verification email → sign in. Some addresses also need admin approval; you get an email when approved.
- **Forgot password?** Click **Forgot?** on the sign-in page.

Switch language with **DE / EN** in the top bar.

2. Book a slot

Book a Spot → pick **location** → **date** (today up to 31 days ahead) → **time slot** → **Confirm booking**.

Slot	Time
Morning	06:00 – 12:00
Afternoon	13:00 – 19:00

Tip: tick **Book entire week** to book Mon–Fri in one go.

3. What happens next

You booked…	Result
Before 21:00 the evening before	**Pending** → at 21:00 slots are allocated by a fair draw (if more people booked than slots exist)
After the draw, or for today	**Confirmed** right away if a slot is free, otherwise **Waitlisted**

- **Got a slot? Confirm** it in **My Bookings** by **07:00** (Morning) or **13:00** (Afternoon). You get a reminder.
- Not confirmed in time? If someone is waiting, you lose the slot. If nobody is waiting, you keep it.
- **Waitlisted?** Nothing to do — you get a slot automatically if one frees up.

4. My Bookings

See all your bookings here. **Confirm** or **Cancel** them. Don't need a slot anymore? **Please cancel** — a colleague gets it.

Status	Meaning
Pending	Waiting for the slot allocation at 21:00
Slot assigned — Confirm	You got a slot — confirm it
Confirmed	The slot is yours
Waitlisted	Waiting for a free slot
No slot / Expired / Cancelled	Booking is over

Problem with your slot? On **today's** booking with a slot, click **Report problem** and choose:

Problem	Extra details
Spot is occupied	Licence plate of the blocking car: country (D / A / L / other), type (Standard, H, E) and number
Spot is unusable	—
Spot cannot be found	—
EV charger fault	—

Add a comment if you can → **Report problem**. All admins get an email with the slot, the problem and your name.

5. Good to know

- **One booking per date and time slot** across all locations.
- **Profile:** set your preferred location, slot and licence plate. The plate is optional: it only helps admins identify your car when you report a slot problem. It opens no barrier and is not needed to enter the car park.
- **Push notifications:** Profile → **Enable push notifications** (per device).
- **Install as app:** browser menu → **Install app** / iPhone: Share → **Add to Home Screen**.
- **Your data:** Profile → **Download my data** or **Delete my account**.
- **Feedback: Feedback** button next to **Profile** in the menu → write a message → **Send feedback**. It goes to all admins by email.

6. Problems?

- **Can't sign in?** Check the verification email, or use **Forgot?**. Locked accounts unlock after a short wait.
- **No allocation result?** Check **My Bookings** (and your spam folder).
- **Push not working?** Profile → **Send test notification**; disable and re-enable if needed.

For Admins

The **Admin** menu lets you manage **Locations**, **Parking Slots**, the **Grid Layout**, **Blocked Days**, **All Bookings**, **Lottery History** and **User Approvals**. Super Admins also manage **Users** (roles, disable, delete).

- **Emails you receive:** lottery failures, users awaiting approval, **slot problem reports** and **user feedback**. Each problem report names the slot, location, booking, problem, any licence plate and comment, the reporter and their own plate from the profile (contact them by their address in the mail; replying goes to the system sender).
- **Grid Layout** is admin-only; users don't see the parking map. Göppingen follows the site plan: one lane, P110–P097 on the left, P135–P122 on the right, charging stations (Ladesäulen) at the top.
- **Deactivated locations** appear only under **Locations**; Parking Slots, Grid Layout and Blocked Days list active locations only.
